

# The Bennett **ZX-1**

## TRANSFORMING ONE AMERICAN ICON INTO ANOTHER.

A truly astounding transformation of an American icon has occurred and is now available to any C6 Corvette owner. . .The Bennett ZX-1. Prototyped, developed, production tooled & sold exclusively by Bennett Coachworks LLC. This conversion is produced and installed by the renowned Bob Bennett and his team at Bennett Coachworks LLC, known for their award winning Concours d'Elegance restorations, unmistakable hot rods and customs, Industry establishing COBRA Replicas and "built to win" race cars.

# BEAUTY AND POWER ALL WITH CONTROL

A powerplant that can propel you to a 0-60 time of 3.2 seconds, and a quarter mile time under 11 seconds, demands a way to rein in that speed with equal force. The ZX-1 has the components to do just that. But there is much more than just starting and stopping. Along the way you will need a level of agility and performance to carry you through the turns. With our select offering of suspension components we can create a custom package to suit your specific tastes that puts both you and the car in control.

## Brembo Brake ZX-1 Package

- Brembo Monoblock Billet Calipers
- Two 6 Piston Calipers, with 14" cross drilled/vented front rotors
- Two 4 Piston Calipers, with 13.6" cross drilled/vented rear rotors
- These are the throw you through the windshield, haul you down from space brakes

## Long Tube Headers with Cats & X Pipe

This high performance exhaust will take your ZX 1 to a whole new level. Constructed by hand, utilizing CNC cut exact fit flanges, 1 7/8" tubes and 3" collectors. Named "Smooth Flow" as result of their construction having no sharp bends and very few welds, these headers are manufactured by the same folks that worked with GM to produce and supply the headers for the LS 1 engines in the ASA racing series. You will surely enjoy the added performance and aggressive sound from an already exhilarating ZX 1 exhaust system. Includes Random Tech Hi Speed Cats and XPipe.

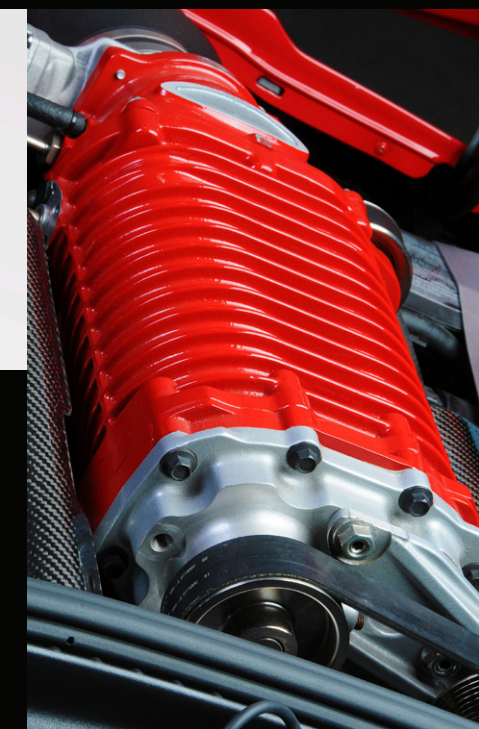

## Pfadt Coil Over Adjustable Suspension & Front/Rear Adjustable Premium Sway Bars

One of the key advantages of our coil over kit is the flexibility with setting ride height. The shock bodies are fully threaded and thread into (or out of) the lower mounting cup giving you the ability to adjust the overall shock length by about 3 inches. It's no problem to maintain stock ride height or slam it nice and low. The important thing about changing ride height by using our threaded body is that you don't have to sacrifice shock travel to lower the car. Compared to the stock C6 Z06 leaf springs, our coil over spring assemblies are approximately 50% stiffer. Pfadt brand components are strong, lightweight and tested for dependability and durability.

## 600+ BHP V8 supercharged

- Utilizing Eaton/Magnuson's Roots style Supercharger with increased boost
- Liquid to Air Intercooler, integral to intake manifold base
- Procharger's Centrifugal style supercharger may be swapped for the Magnuson installation if desired
- 2008+ model corvettes will generate +630BHP/510 lb ft with Supercharger setup
